

## **TBX-Min Dialect Definition**

**Core:** Core

**Additional Required Module(s):** Min

**Use TermComp module:** False

### **Description:**

TBX-Min is a dialect of TBX designed for simple and straightforward storage of bilingual or monolingual glossaries. The primary use case for TBX-Min is to transmit a glossary to a translator, but TBX-Min can also be used by translators to submit glossaries they have created. It was designed to be easily converted to and from TBX-Basic.
